Preparing for future transport systems

How to plan for the increased digitalization of the transport system.

Mikael Ivari, Senior Advisor, Urban Transport Administration, City of Gothenburg
Five years ago
Key outcomes from a city perspective

• How can AVs be part of new mobility solutions and improve the everyday lives of our citizens?

• How can AVs help mitigate the challenges of safety, congestion, air pollution and CO₂

• Explore how the use of AVs can contribute to design attractive city environments
Transportation planning
Planning with CAVs

A Human Approach
Creating Public Awareness
Developing digital Eco-system
What we are looking for

- Cities and/or other public authorities who have started to prepare for the increased digitalization of the transport system.
Thank you for listening!
